

## Total Solution for Protein Purification & Production on Large Scale

Orochem Technologies Inc., a U.S. based Biotech Company has successfully commercialized purification and production of plant proteins such as Rubisco from spinach and alpha-alpha, recombinant heme from yeast, and proteins from peas. Orochem's R&D center in Naperville, Illinois provides vertically integrated Chromatography and Simulated Moving Bed processes from discovery to manufacturing. Orochem's team of chemists and chemical engineers assist customers to develop and implement economical and scalable processes with very short cycle time.
